WHAT SETS IT APART

The Data & Analytical industry coupled with digital and process transformation has been very dynamic and challenging for PiLog Group. The key differentiators that add to its uniqueness are industry segmentation and a key focus on Oil & Gas, Telecom, Petrochemicals, Retail, Cement, Airports and Asset-intensive heavy industries, benchmarking the outcome and continual value realization for process improvements with master, meta and analytical controls, a special focus on multi-domain products & services especially on Data Quality HUB, Collaboration Workbench, eSPIR, Vendor / Material linkage, Complex Services, Bill of Materials, ETL etc. compliant to ISO 8000, ISO 14224, etc, the provision of modular services and products on remote, online, real-time models seamless on cloud and on-premise, and an improved customer experience and expectations management with cohesive partnership and engagement models.

PiLog has modulated business models to meet market demands against all odds. The key proponents of evolving business models for peers to envy are Modular, Scalable, Adaptable, Interoperable and Single Technology platform (Data Quality HUB) solutions providing high economies of scales in Data and Analytics. PiLog has reinvented the 'follow the sun' service delivery model with remote, online, real-time, self-help service delivery.

The autonomy of operations for group companies with centralized knowledge management and COE spread across the globe, and incremental investment on technology, innovation and reskilling has gained PiLog a glowing reputation in the industry.

PiLog offers modular solutions on Data Governance, Harmonization, ETL, Predictive Analytics and Collaborative Workbench offered from a single platform, which result in reduced TCO and improved ROI on its products and services. The buzz in the market around AI/ML, Big Data, Data Lakes, IoT around Data and Analytics had been ingrained into its philosophy of product management and service capability management. PiLog's repositories and data harmonization functionality are tailored for industry-specific, multi-domain master data upkeep. It has a flexible

and adaptive Analytical Platform with an ability to integrate and operate on Big Data Platforms with improved user experience. Its Mobility-enabled processes and technology integration reduce the human effort deficiencies and reliability management.

PiLog's Innovation Council, the umbrella for product development, service improvements and customer experience, has led to direct & rotational involvement of product development into services and vice versa, and helped it attain new customers but also expand existing customer base revenue, growing at a whopping rate of 12% YoY.

WORK CULTURE

Imad A. Syed, Chief Executive Officer-Middle East & APAC, has created a work culture at PiLog that ensures positive outcome from the entire team. The company has Monthly Business Transformation Sessions, focusing on its values, vision, plans and strategies. Monthly & Quarterly reviews with Sales, Marketing and Delivery Leadership and Weekly Quiz and Engagement Program at line Management keep the company on track and the employees motivated.

PiLog has transformed its working culture over the past decade and a half. Its Flat World and Transforming Organization with open door policy enable everyone to perform, and the flexible and ethical working practices for employee welfare without compromising on customer value management ensure right compensation for right people at the right time.

Imad has always believed in building leadership up from the grassroot level, breaking it down into smaller chunks and implementing Kaizens at various levels. PiLog also offers multidimensional development opportunities to its internal business partners with immense stress on "Company by People, for People and of People".
